

## JackJaw, BUT SIMPLER!

Lightwave's Peg Puller Machinery Attachment is a compact version of our JackJaw which is easy to attach on any excavator or bobcat ect. Its easily attachable with a D Shackle which is included in the purchase.

It's a perfect tool to pull out star pickets, poles and stakes.

## AVALON 2025

The exhibition provided an excellent environment for us to network, showcase our products, and engage with key players across the aviation, defence, and related industries. It highlighted the latest technological advancements in aviation and created valuable opportunities for local manufacturers and suppliers to interact, learn, and build partnerships on an international scale.

*"I was pleasantly surprised to see many students and undergraduates attending, sent by various universities to gain exposure to these technologies. This bodes well for the future of our workforce."*

– Geomagic Team

## Farmworld

Our team had a fantastic 3 days at Farmworld and provided a great opportunity to connect with farmers, industry professionals and families, sharing insights and demonstrating the value of our equipment.

## Kreon ONYX

### Measuring arm - Portable CMM

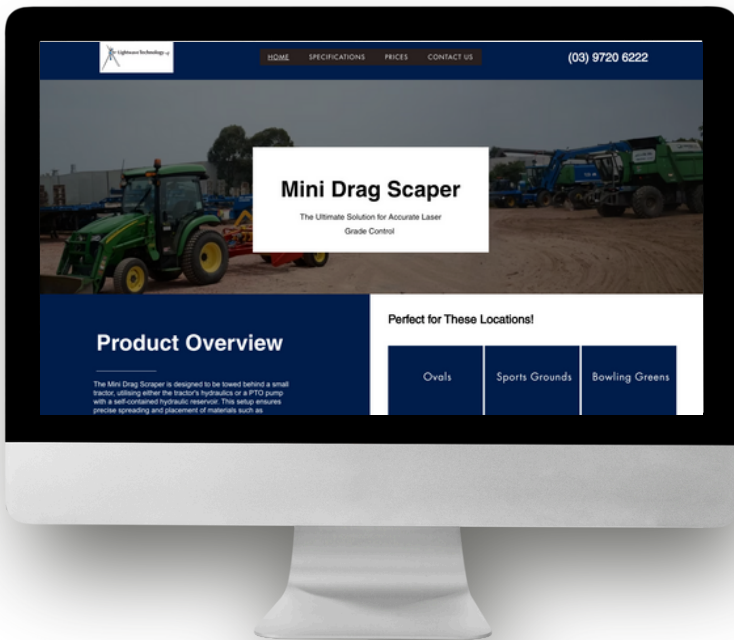

Ergonomic solution for seamless 3D scanning and measurement

# WEBSITE LAUNCH

This month, our Mini Drag Scraper website has been updated to provide you with more accessible information. If you're interested in purchasing our Mini Drag Scraper for any job, feel free to reach out!
